BILGIN CAN ISIKOGLU

IT & AI prompt engineering

About Me

Analytical and structured approach to developing AI-supported workflows and optimizing processes through clear IT communication.

+49 157 5264 0893

can.isikoglu@gmail.com

Dieselweg 1, 30926 Seelze

Language

- English (C1)
- Turkish (partially native, not fully developed)
- Spanish (B1)
- German Sign Language (A2)
- German (native)

Expertise

- Data Management & Record Keeping
- DIN 5008 Formatting
- Problem-Solving
- AI-Assisted Work

Job Experience

EmergenzHub — AI-Based Service Project (2025, Germany)
- Created an AI-driven platform for document automation and knowledge management.
- Currently paused due to lack of financial support.

Telquest GmbH — Remote (2023–2024, Germany)
- Executed data collection and analysis for social and political research (Infratest Dimap).
- Maintained databases and structured reports (DIN 5008).

DT & P International — Essen (2009–2010, Germany)
- Conducted research surveys and interviews in social sciences.
- Ensured data accuracy and documentation quality.

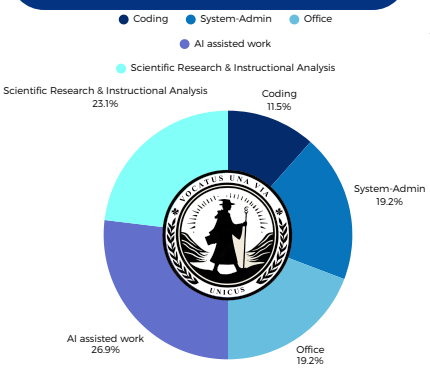
Education

BBS-ME Otto-Brenner-School
2025 -2026, Hannover - Germany, Information Technology Assistant

Dr. Kurt Blindow School
2023 -2024, Bückeburg - Germany, Information Technology Assistant

- **Operating System Administration** (Linux, Windows)
- **Network Management** (Protocols, Firewalls, SSH, SCP)
- **System Communication and Logging** (syslog)
- **Security and Access Control** (User/Group Management, Permissions, Authentication)
- **Automation and Scripting** (Bash, IDE-Shell, CMD, PowerShell)

Skills Self-Assessment



Independent Study

Theoretical and Literary Studies 2016 -2025

Strategic & Existential Philosophy
- Taisen Deshimaru - In the Martial Arts of Zen
- Miamoto Musashi - The Book of Five Rings
- Sun Zi - The Art of War
- Thomas Hobbes - Leviathan
- Record Keeping - Legally and Linguistically Correct by Edmund Beckmann / Steffen Walter

Information Technology
- Anton Spraul - Think like a Programmer
- Simple IT System - basic knowledge for IT profession - Westermann
- Dissertation by Dr. Nikita Dümmel - pseudocode MuLE
- Windows 8 Manual by Rober Klaßen
- Google Beginner's Guide by Rainer Gievers
- Linux Mint - Dirk Becker

Applied Practice 2016 -2025

Systems Thinking & Analytical Process Review
- Analyzes technical, social, and psychological systems.
- Identifies structural weaknesses, flawed assumptions, and documentation gaps.
- Uses evidence-based and AI-assisted methods (e.g. SSpEIR) for process clarity and reliability.

Creative Interface & AI Workflow Design
- Integrates IT, law, and philosophy into structured digital problem-solving.
- Designs AI-supported workflows, service concepts, and resonance environments.
- Applies semantic and network-based models for knowledge organization.

Integrity, Communication & Technical Skills
- Communicates with analytical precision across media and languages.
- Ensures documentation quality, transparency, and structured reasoning.
- Skills: Prompt-engineering · Python (experimental) · Linux · VPN/Tails · Data visualization.

Integrity & Process Reliability
Supports transparent decision-making by identifying documentation gaps, inconsistencies, and procedural risks using structured analysis and AI-supported methods.

Coding
by Dr. Nikita Dümmel – A Multi-Paradigm Language for Education
- Foundations in C, Java, Python through pseudocode-based logic structures.
