BILGIN CAN ISIKOGLU

AI Process Engineer

About Me

I design and analyze AI-supported workflows where legal, regulatory and technical systems intersect, with a focus on causal integrity and documentation reliability

Language

- English (B2)
- Turkish (partially native, not fully developed)
- Spanish (A2)
- German Sign Language (A1)
- German (native)

Expertise

- Data Management & Record Keeping
- AI Output Validation
- Legal-Tech AI Systems & CLI Workflow Design

Job Experience

EmergenzHub — AI-Based Service Project (2025, Germany)

- Created an AI-driven platform for document automation and knowledge management.
- Currently paused due to lack of financial support.

Telquest GmbH — Remote (2023–2024, Germany)

- Executed data collection and analysis for social and political research (Infratest Dimap).
- Maintained databases and structured reports (DIN 5008).

DT & P International — Essen (2009–2010, Germany)

- Conducted research surveys and interviews in social sciences.
- Ensured data accuracy and documentation quality.

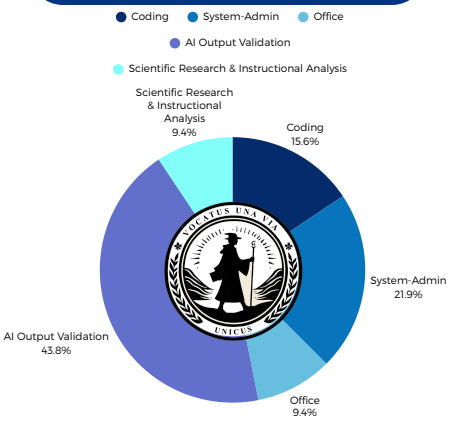
Education

BBS-ME Otto-Brenner-School
2025 -2026, Hannover - Germany, Information Technology Assistant

Dr. Kurt Blindow School
2023 -2024, Bückeburg - Germany, Information Technology Assistant

- **Operating System Administration** (Linux, Windows)
- **Network Management** (Protocols, Firewalls, SSH, SCP)
- **System Communication and Logging** (syslog)
- **Security and Access Control** (User/Group Management, Permissions, Authentication)
- **Automation and Scripting** (Bash, IDE-Shell, CMD, PowerShell)

Skills Self-Assessment



Independent Study

Theoretical and Literary Studies 2016 -2025

Strategic & Existential Philosophy

- Taisen Deshimaru - In the Martial Arts of Zen
- Miamoto Musashi - The Book of Five Rings
- Sun Zi - The Art of War
- Thomas Hobbes - Leviathan
- Record Keeping - Legally and Linguistically Correct by Edmund Beckmann / Steffen Walter

Information Technology

- Anton Spraul - Think like a Programmer
- Simple IT System - basic knowledge for IT profession - Westermann
- Dissertation by Dr. Nikita Dümmel - pseudocode MuLE
- Windows 8 Manual by Rober Klaßen
- Google Beginner's Guide by Rainer Gievers
- Linux Mint - Dirk Becker

Applied Practice 2023 -2026

AI Systems Analysis & Validation

- Identifies structural weaknesses, flawed assumptions, and documentation gaps across technical, legal, and organizational systems
- Developed SSpEIR & Fact-Bound Kernel frameworks: corrected falsified core claims (1.0 → 0.48 reliability), reduced hallucination rates through multi-layer cross-referencing
- 3,700+ documented AI conversations across 3 years, exported and archived as verifiable workflow evidence
- AI-assisted legal evidence analysis for civil proceedings (373 files, SHA256-verified, multi-cluster causal chain reconstruction)

AI Workflow Design & Legal-Tech Applications

- Designs AI-supported workflows for legal document analysis, evidence structuring, and escalation routing
- Published portfolio of 5 Legal-Tech AI prompts on PromptBase (Legal Evidence Structuring, Asymmetriedetektion, Greyzone Gate Filter)
- Configured and optimized Claude Code CLI for high-volume legal document processing (token management, MCP optimization, sequential file processing protocols)

Technical Skills & Coding

- Prompt-engineering · Python · Linux · VPN/Tails · Bash · Data visualization
- Applied Python scripting and JSON for evidence archive indexing, session snapshots, and AI workflow configuration
- Programming fundamentals via pseudocode-based logic (MuLE by Dr. Nikita Dümmel)

Independent Practice — (2016–2018)

- Martial arts instruction (Tai Chi Chuan)
- Instrumental training: guitar craftsmanship, maintenance & repair, tuning systems, music theory, rhythm & notation
- Meditation instruction: breathwork, impulse control, targeted muscle contraction

All data presented in this document is factually accurate and evidence-based. I take full personal responsibility for its completeness and correctness.
